# GPLUS LIVE

DESIGNED BY GROUNDWORK PLUS

## WHY GPLUS LIVE?

Regulation, community expectation and the use of data within our industry is constantly evolving. **GPLus Live** gives you the capability to be in control of your data whilst ensuring you remain on top of compliance obligations no matter the size or complexity of your project.

Stay in control of your compliance, community and industry expectations whilst reducing errors in recording.

Available for registered users via a simple interface from any device and location.

Proactively manage data to meet environmental, health and safety and material testing obligations.

## WHAT IS GPLUS LIVE?

**GPLus Live** has been developed to help you manage compliance proactively. It allows you to store useable, real-time data via a user-friendly interface all in one place from any device or location when you need it.

The system gives you the capability to schedule, analyse, review, search for events, report over time, and identify trends to spot a potential non-compliance before it happens.

## HOW DOES IT WORK FOR ME?

### Personalised setup and support

- ▶ Tailored to site-specific requirements and business preferences
- ▶ Personalised dashboard
- ▶ Customised training and online chat function for ongoing support
- ▶ Regular system updates based on user feedback

### User access

- ▶ Different permission levels and reporting streams can be set up depending on company structure and responsibilities
- ▶ Built-in capability for use offline

### Storage

- ▶ Simple and secure access to all data including historical information
- ▶ Data tracking and customised workflow maintain data integrity
- ▶ Central storage of important documents and company procedures ensures consistency across an organisation
- ▶ Export data function

### Triggers, alerts and scheduling

- ▶ Trigger limits can be set to promote proactive action
- ▶ Scheduler shows completed, overdue and future events in calendar format
- ▶ Reminder notifications assist in ensuring actions are not missed
- ▶ Alerts automatically sent by email and SMS

### Track Trends

- ▶ Graphs are prepared at the click of a button to track trends or compare variables
- ▶ Alert parameters can be set to provide warnings if trends change

### Security

- ▶ Built using the latest ASP.NET Core MVC framework from Microsoft
- ▶ Hosted on the Microsoft Azure cloud service
- ▶ Multiple database backups
- ▶ Data encryption ensured

# Environmental Compliance Monitoring Module

In recent years, there has been increased focus on compliance by regulators. Approvals are also more complex, hence the need for improved data storage and management.

The **GPlus Live** Environmental Compliance Monitoring module is a unique and user-friendly system that reduces paperwork, administration cost and time while improving useability of environmental data and streamlining auditing processes and non-compliance notifications and tracking - all with ongoing support from Groundwork Plus.

## DATA MANAGEMENT

Enter, review, or download data, quickly generate summary reports and store relevant reports and approval documents. Data can be entered directly into the system through a simple interface which can include results, photos, and observations. A quality control system ensures your data is valid and available when needed.

Quickly generate data and graphs

## INSPECTIONS & FORMS

Custom online forms can be included as part of your data tracking. These may be standalone events or can be provided as part of a compliance response to ensure appropriate actions, recording and reporting is undertaken.

## TRIGGERS & COMPLIANCE LIMITS

Set up proactive triggers and alerts to assist you in identifying issues before they become costly non-compliance events and promote continuous improvement and performance.

## SCHEDULING

Schedule a future event ensuring monitoring requirements are not missed. Responsible persons, instructions and SOPs can be attached to these scheduled events to ensure sampling is undertaken correctly.

Easily schedule future events

## SUPPORT

Groundwork Plus will work with you to set up a profile of single or multiple sites and can enter any historical data.

Your personalised dashboard includes:

- ▶ Site locations and monitoring points
- ▶ Monitoring requirement, parameters and forms
- ▶ Compliance limits, proactive triggers and alert
- ▶ Relevant documents, approvals, management plans and SOPs

# Safety and Health Module

## SYSTEM DEVELOPMENT

Groundwork Plus will work with you to create a digital Safety and Health Management System (SHMS) for single or multiple sites, which includes user-friendly and simplified information, e-forms, registers, checklists and visual aids.

Task/Item	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
1. Policy, Structure and Responsibility	✓											
2. Communication and Consultation	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
3. Competence and Qualification	✓											
4. Health and Safety File	✓											
5. Health and Safety File	✓											
6. Health and Safety File	✓											
7. Health and Safety File	✓											
8. Health and Safety File	✓											
9. Health and Safety File	✓											
10. Health and Safety File	✓											

User-friendly and simplified information

## ACCESS AND USE

Users can be set up with different approval permissions and given a personalised login to ensure all actions are tracked. Elements of the SHMS are displayed with related links to relevant information making the contents easy to navigate.

E-forms can be utilised for ease of data entry. Completed forms can be downloaded in word or PDF format with company logos displayed. Registers (e.g. risk registers, training registers and safety data sheets) can be customised to suit business needs with ease of data recall.

## SCHEDULING

Schedule routine actions such as inspections and maintenance tasks ensuring requirements are not missed. Responsible persons, work instructions and SWMS can be attached to these scheduled events to ensure actions are undertaken correctly.

## SUPPORT

Groundwork Plus will provide customised training and an online chat function ensures ongoing support in using the system.

# Testing and Quality Module

Groundwork Plus has established a NATA accredited aggregate testing laboratory to complement our existing petrographic analysis laboratory. A laboratory information management system (LIMS) has been added to **GPlus Live** to support our modern laboratory operations.

## DATA USABILITY

The system allows you to search data easily, graph results and review reports and test certificates, all with the click of a button.

Client Sample ID	Test Date	Test Method	Wash water after tested	Degradation Factor

Access NATA certified test certificates

# Digital Document Management

Turn typed reports such as Environmental Management Plans, Blast Management Plans, and Quality Management Plans into a useable, easily searchable and trackable digital platform.

GPlus Live can display reports, programs and management documents online in a digital, searchable, and usable format.

- ▶ Review or download specific parts of documents
- ▶ Schedule management actions via the digital scheduler incorporating reminders and alerts
- ▶ Completed forms or registers can be converted to E-forms or documents can be saved directly into the system

Search and display plans and reports
